Commercial Specification

Technical spec for contractors, developers & facilities managers

100% coconut coir organic mulch — engineered for UAE climate conditions.

Not pine bark. Not wood chip. pH neutral. 18–24 month lifespan.

Updated July 2026 · mulch.ae

Commercial Specification

Technical specification for contractors, developers, facilities managers and government projects supplying Green Zen Organic Mulch.

Product

- Material: 100% coconut coir (coconut husk fibre) — a renewable agricultural by-product.
- pH: neutral (5.8–6.8). Not acidic like pine bark.
- Colour: natural dark brown — not artificially dyed.
- Service life: 18–24 months in UAE climate before top-up.

Specified installation

- Commercial standard depth: 70mm across planted beds and exposed landscape areas.
- Keep 50–100mm clearance from trunks and stems.
- Install over cultivated, weed-free, pre-watered soil.

Supply & delivery

- Bulk supply by the cubic metre (AED 500/m³) or in 50L bags (AED 55) for smaller works.
- Phased delivery available for large or multi-zone sites.
- UAE-wide delivery: Dubai, Abu Dhabi, Sharjah, Ajman, RAK, Fujairah, Al Ain, Umm Al Quwain.

Estimating quantities

Area	Depth 50mm	Depth 70mm
10 m²	0.5 m³	0.7 m³
25 m²	1.25 m³	1.75 m³
50 m²	2.5 m³	3.5 m³
100 m²	5.0 m³	7.0 m³
250 m²	12.5 m³	17.5 m³
500 m²	25 m³	35 m³

Sustainability note

As a coconut by-product, coir mulch diverts agricultural waste and stores organic carbon in the soil as it breaks down, supporting water-efficient, low-carbon landscape specifications.
